

MODULE 6
EUROPEAN TELECOM
NETWORK

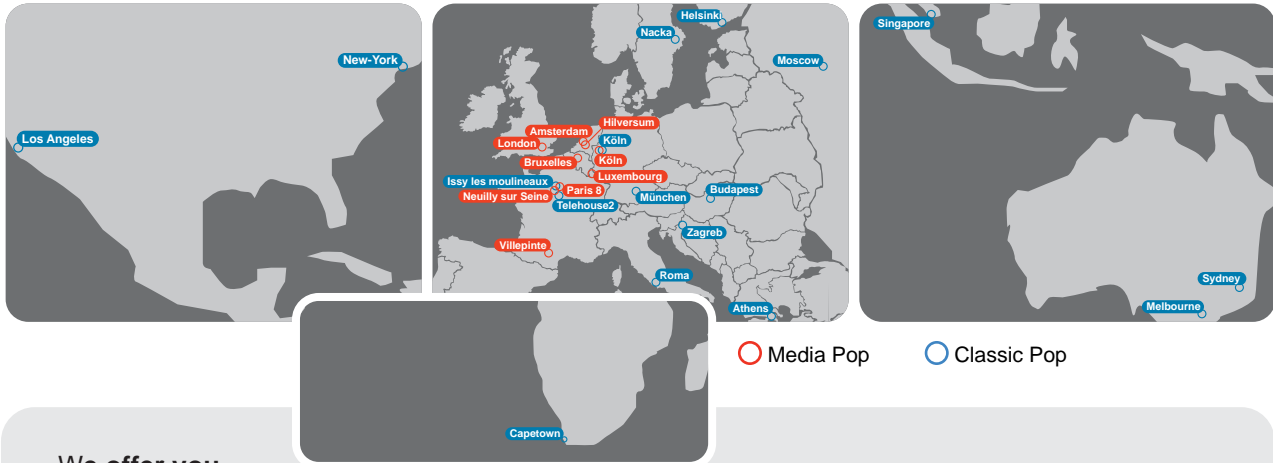

BCE has a dense telecom network with agencies conveniently located in most Western European cities.

Our close relationship with the major European satellite operators (SES, Eutelsat) allows our clients to uplink/downlink signals at a wide choice of locations.

Our exclusive features

- A closely knit telecom network with offices in Luxemburg, Paris, Hilversum, Amsterdam, Cologne, London and Brussels.
- A partnership with the major European satellite operators (SES – Eutelsat) with on site uplink/downlink capabilities
- Our capability to deliver media at a location convenient to you anywhere in Western Europe

We offer you

- A highly secure backup platform interconnected to the outside world to safeguard your A/V content and all types of computer data (please also refer to module 5 of DML services offered by BCE).
- Deep/dormant very long term archiving (through the central storage system) with online access, if needed, via dedicated servers.
- A complete range of services available from BCE allows convenient, one stop shopping. Hosting and maintenance of your applications, co-location centre services, interconnection via high security Ethernet link (firewall, restricted access, 24/7 monitoring of access activity).
